You got it!

The **Write** Path to Sustaining Our Environment

EZ Office Products® partnered with TerraCycle™ to help your business reduce waste. By creating a second life for used pens, pencils and markers (also called writing instruments), your business will keep more waste out of our landfills.

Include your business as one that helps make a sustainable difference!

Join our local initiative and help your company green team effort by giving them another tool: Collect used dried out writing instruments (pens, mechanical pencils and all markers) for [upcycling](#) into new and innovative products.

You can participate by placing a convenient EZOP recycle/upcycle bin in a noticeable area. Order *free item number*: **EZP PENRECYCLEBIN**)

Employees or customers simply drop their dried out writing instruments in the bin. When you're ready, call EZ Office Products at (608) 310-4300 and let us know you have writing instruments for upcycle pickup and we'll swing in to your business and collect them.

Participation is simple and completely FREE for our business clients. But, that's not the best part...

The best part is that until the end of 2011, \$0.02 per acceptable writing instrument will be paid to a local 501(c)(3) non-profit.

For the remainder of 2011, EZ Office Products chose [Aldo Leopold Nature Center](#) as the non-profit that will receive funds from the collection of your dried-up, no-good pens, pencils and markers! (Next year, we will be sending a survey so you can vote on the local non-profit of choice.)

For more information, call EZ Office Products at (608) 310-4300 or contact your sales rep.
